Printing & Downloads

Print & Export · https://chance2win.org/research-library/printing-downloads/

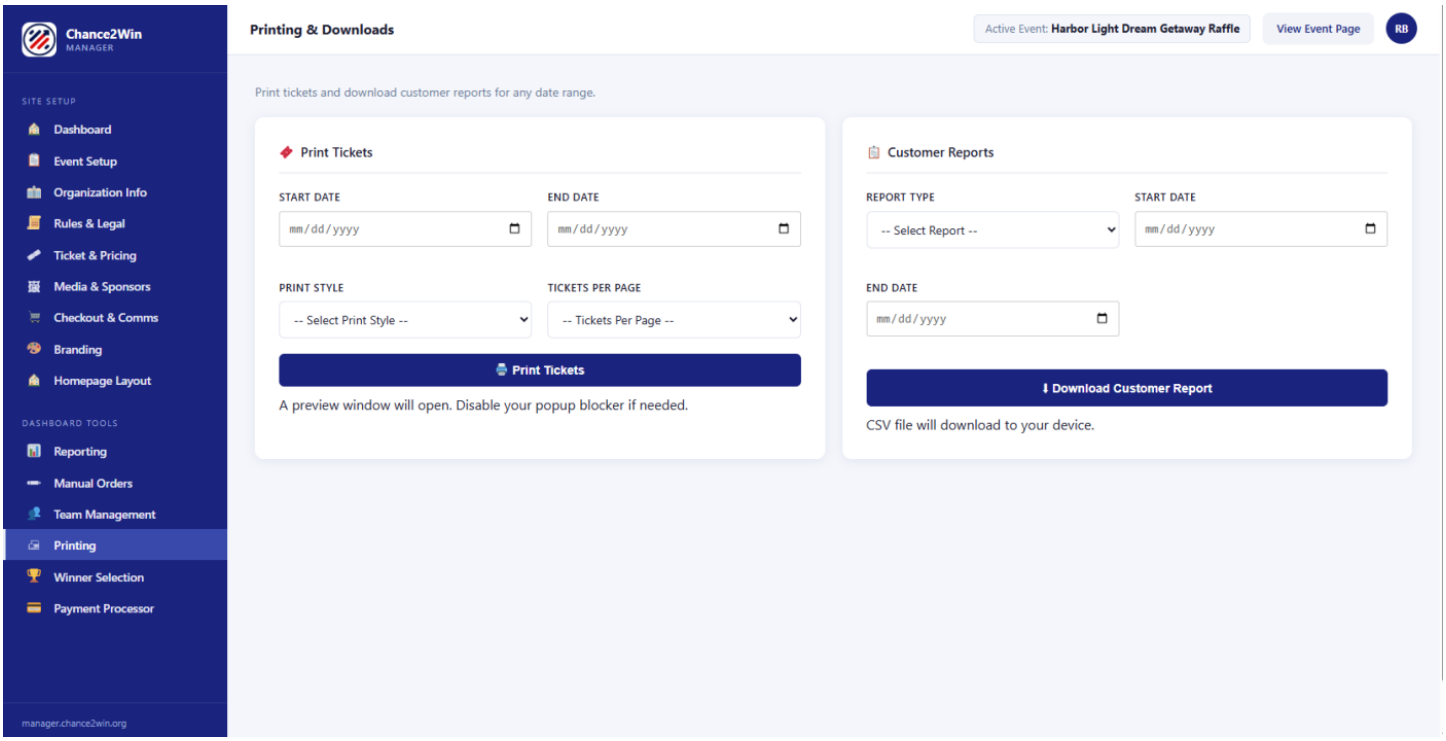

Sometimes you need paper — physical tickets to hand out, or a clean export for your records. This tool does both.

Printing & Downloads: ticket print options

Printing physical tickets

Choose a **Category**, a **Prize**, a **Print Style**, a **date range**, and a **page layout** (24 or 44 per page), then open the print preview. Great for in-person events where people still like a ticket in hand.

Customer Reports CSV download options

Downloading customer reports

Separately, export **Customer Reports as CSV** — pick a **report type** and a **date range** and you're done. Perfect for mail-merge thank-yous, next year's invite list, or handing clean data to your treasurer.

> **Pro tip.** Export your customer list after the event and turn it into next year's head start. The people who bought this time are your warmest leads for the next one — that's where repeat fundraising is won.
