Winner Selection

Prizes & Winners · https://chance2win.org/research-library/winner-selection/

The big moment. Winner Selection draws your winners at random from the pool of eligible tickets, one prize at a time, and lets you notify them with a click.

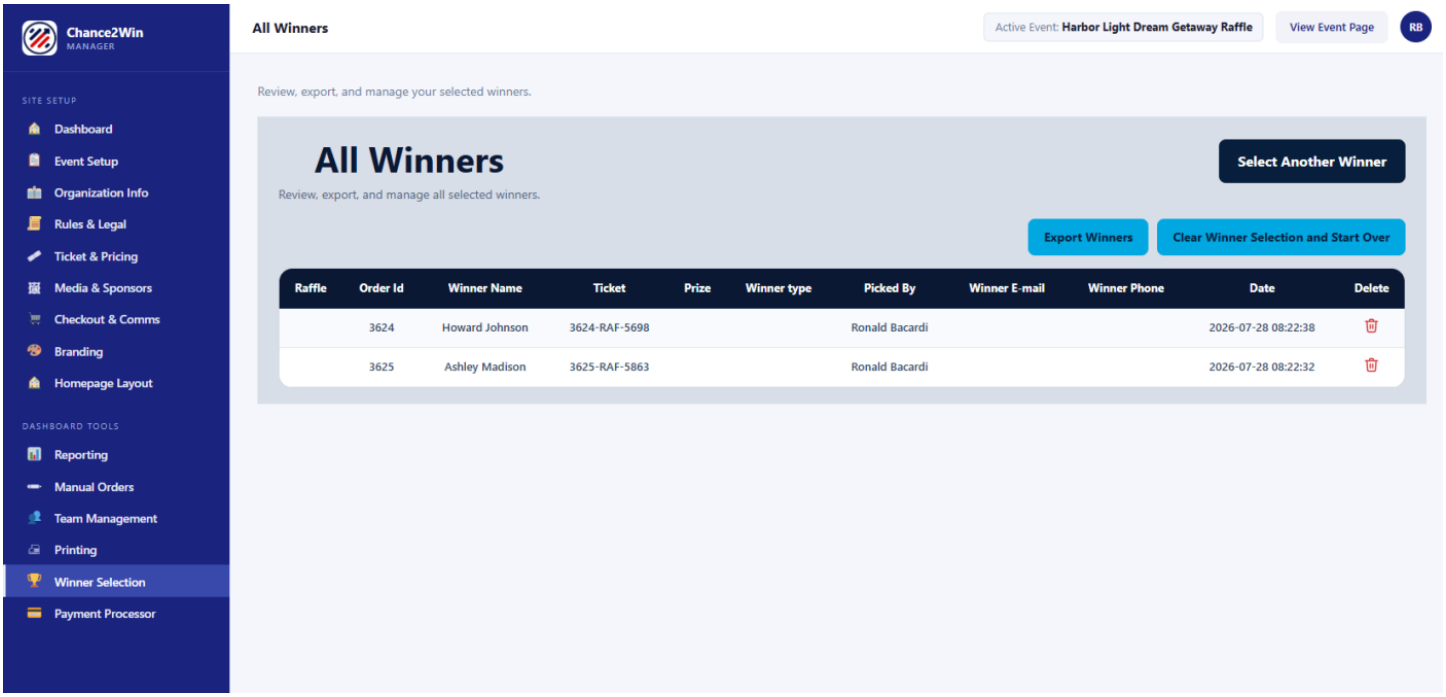

Winner Selection — your list of prizes

How the draw works

Your prizes appear as a simple list — one grand prize or fifty, however many you added. In a traditional raffle every ticket sold is eligible for every prize, so each draw pulls at random from the full pool of entries.

1. Click a prize to draw a winner at random.
2. For a prize with more than one winner, click again to draw the next.

3. The winning ticket number and name appear under the prize.
4. Click **Notify** to email the winner.

A drawn winner, with the Notify button

Reality check. Winner Selection stays **locked until your event's end date has passed**. That's on purpose — it makes it impossible to draw before every entry is in, which protects you and reassures your supporters that the draw was clean.

Pro tip. Draw live — on Facebook, at your event, wherever your people are watching. A public drawing is the single best trust-builder you have, and it makes next year's raffle an easier sell before you've even started.

Winners drawn and notified? Pull your final records from the Reporting Dashboard and Prize Reports, and take a well-earned breath.

Big draw coming up and want it to go smoothly? Call us beforehand — we love this part — The Chance2Win Team
